JEREMY THOMAS

SOFTWARE ENGINEER

With a Master's degree in computer science and over 4 years' professional experience, including 2 years of apprenticeship, I am seeking a new position as a software engineer. I am looking for an interesting technical challenge in an ambitious team focused on modern technologies, microservices architecture, and software craftsmanship (clean code, refactoring...).

EXPERIENCE

BASF Agro France, Ecully

September 2020 - Present

2-year apprenticeship followed by 1.5-year fixed-term contract and 1.5-year freelancing.

- Independent work on conception and development of web applications and relational databases for complex agricultural business processes.
- Recruitment and technical supervision of apprentices who succeeded me. Migration from an old PHP legacy monolith to a TypeScript Next.js/PostgreSQL stack.
- Agile development and continuous delivery, communicating directly with French and German end users (agronomists).
- Provided advice to teams responsible for international process digitalization, actively participated in writing specifications, and provided technical support to the contracted IT development company in an international context.

Fondation JAE (Career guidance app), Lyon

April 2019 - August 2019

3-month internship followed by a 2-month fixed-term contract

- Internship focused on Business Intelligence: consolidation of relational databases and data visualization/reporting using Tableau.
- Fixed-term contract focused on web development using PHP/JavaScript/MySQL.
